

## About us:

Digital currencies are on the rise all around the globe. Our mission is to make digital currencies usable in everyday life. cryptix AG is a start-up company in the field of FinTech that is offering numerous opportunities, an international environment as well as research and development. We want to enable every consumer and especially every small and medium-sized company to benefit from this entirely new and extremely innovative industry.

To strengthen our team based in **Zug, Switzerland** we are currently seeking, at the earliest possible date:

## IT Infrastructure Architect (f/m)

### What to expect:

- Full-time permanent position in a trendsetting industry
- A young, dynamic team with great ambitions
- International activity bearing huge future prospects
- Development potential in a young and fast-growing company
- Challenging and exciting tasks
- Take responsibility beyond your own area
- Flexible working hours and good work-life balance

### Your tasks:

- Design, setup and maintain IT-infrastructure for high reliable, high secure end-consumer products
- Design and implementation of company IT-infrastructure (on-premise, Azure cloud, network ...)
- Develop security concepts for consumer products and company IT-infrastructure
- Planning and implementation of network infrastructure for different locations
- Maintenance of Office365, Azure and inhouse systems
- Proactive development of the IT-infrastructure
- Installation and administration of the operative clients (Windows Desktop/ Notebook/ Android Tablet/ Mobile)
- Planning and implementing backup and redundancy systems
- Deployment and configuration of required database systems (MS SQL, PostgreSQL and others)
- Provision and distribution of the required software applications
- Continuous performance monitoring and optimization of the operational IT-Infrastructure

Your tasks are of a technical nature but also are coordinative and organizational. In addition to your professional qualification, excellent communication skills will be essential.

## Your profile:

- Associate Degree or higher in a related field or equivalent experience as a system administrator, specialized in cloud environments
- Several years of professional experience in designing and administration of Microsoft Azure or other cloud environments (AWS and others) as well as professional experience in IT system administration and support
- Experience in designing network and IT-infrastructure in a secure and reliable way
- Team player who has a strong independent working method and who can handle complex system environments
- A clean criminal record (please attach a character reference)
- Experience in managing Office365 and Azure
- Security in handling event logs and performance analyses
- Experience in working with container- and/or microservices- based architectures
- Experience in the deployment of Microsoft- based server applications (.NET, .NET Core)
- Preferably experience with Microsoft PowerShell and configuration management (Ansible, Puppet, Chef and so on) and software distribution
- Preferably certified in relevant technologies

You can expect a very exciting job in an industry that is just emerging, where you will be working internationally with teams from the most diverse disciplines. We offer personal development opportunities and can give you the unique chance to contribute to shaping an international ecosystem!
